Technical Skills

Languages C#, C++, Java (Basic).

Technologies/Frameworks: Unity, Blender for 3D Modeling.

Skills: C#, Problem Solving, Unity, Blender 3D Modeling.

Game Development Projects

Rabit Rush 2D | *using Unity, C# scripting (fully working)*

Jan 2024 - Feb 2024

- Created a 2D arcade mobile game which is apk using Unity, where designed and implemented unique 2D sprites for the obstacles, collectibles, and characters.
- In this Project, I mentioned OnCollisionEnter2D method that involves collisions with the carrots and stones in the game and highscore method which is store the highest score in the game.
- Itch download Link: <https://deepaklingala16.itch.io/rabitrush2d>

SmashCubrix 3D | *using Unity, C# Scripting (fully working)*

Apr 2024 - May 2024

- Designed a 3D Box runner game in Unity, which passes through the obstacles and the environment contains foggy for the player interaction.
- The box speed will be increased by passing through the obstacles, using the method of Time.deltatime in the game, which represents the time in seconds it took to complete the last frame.
- The box always runs forward because using the AddForce method is used to apply physical forces to a Rigidbody component, causing it to accelerate and move in a realistic, physics-based manner.

Technical Specialization

- Pathfinding & Navigation Systems:** Engineered a dynamic NavMesh system utilizing NavMeshAgent and NavMeshSurface components to enable autonomous agent navigation, real-time obstacle avoidance, and frame-rate independent movement speeds.
- Configured and baked surface collision data across diverse game object topologies, optimizing walkable environments to ensure accurate runtime pathfinding calculations.

GitHub repo link: <https://github.com/DeepakLingala/NavMeshinUnity/tree/Final-Setup>

- Locomotion & Animation Systems:** Developed a smooth, physics-based character controller utilizing nested 2D Freeform Directional Blend Trees to seamlessly transition between idle, walking, running, sprinting, and directional strafing
- Integrated Cinemachine for a polished third-person camera, featuring scroll-wheel zooming and environment collision filters to prevent the camera from clipping through walls or terrain

Certificates

Programming in Java (Basic)

Jan 2024 - April 2024

NPTEL — [Certificate Link](#)

Programming in C++

Jun 2024 - July 2024

Tenvanto Academy — [Certificate Link](#)

Education

Lovely Professional University Punjab

2023 – 2025

Master of Computer Applications

Jalandhar, Punjab

Kakinada Sri Aditya Degree College

2021 – 2023

Bachelor of Computer Applications

Srikakulam, Andhra Pradesh

Sri Chaitanya Junior College

2018 – 2020

12th with MPC (Math's, Physics, Chemistry)
